

'HEALTH OF THE RIVER' - ROTARY YOUTH FORUM

Monday 28th —Friday 1st November, 2019

**CALPERUM STATION
Renmark, South Australia**

***WHERE SCIENCE, THE ENVIRONMENT & COMMUNITY
COMBINE***

Rotary Youth Forum - Health of the River

The 2019 Health of the River Forum will be held at Calperum Station, Renmark from 28th October to November 1st, 2019. The forum is for Yr. 9 & 10 students interested in science, protecting the environment & natural resource management. It provides hands on learning and mentoring from specialist ecologists on a working conservation and research property. Supported by Rotary Clubs, the program provides transport, accommodation, meals, a wonderful learning experience and lifelong memories.

Calperum Station

Calperum Station covers approximately 240,000 hectares and extends from Mallee country to the banks of the Murray River. An internationally significant wetland system, Calperum is home to several rare and threatened species and makes up approximately one third of the Riverland Ramsar site. Managed by a team of ecologists and Aboriginal rangers, Calperum hosts several significant scientific studies and environmental projects, and is regularly visited by universities, schools and international students.

Rotary Youth Forum - Health of the River Field Study Program

Students will rotate through diverse and interesting activities during the program. They will work alongside Calperum Ecologists and Rangers learning about and participating in environmental research and management projects. These may include:

- Black box tree health surveys
- Small mammal and reptile trapping
- Wetland degradation restoration
- Cultural and environmental walks
 - A regional tour of significant 'river related' places of interest.

Skills and Knowledge

Throughout the program participants will be exposed to challenges and scenarios which help develop a range of skills essential for not only science work, but also everyday life. These include:

- Team work
- Analytical thinking
- Scientific research methodology
- Data collection

Programme Inclusions

Whilst at the Forum, students will be surrounded by nature, and all they need to do is make the most of the opportunity to become involved in protecting our magnificent river environment.

We cover the rest, including:

- Transport to and from Calperum station
- Comfortable dormitory style accommodation
- All meals, beverages and snacks provided
